

Hanging Instructions: 24", 36", and 45" Hawaii Island Chains

- Choose your location:

- Center the template in your location and use masking tape to hang on wall:

- use the drywall screw to mark the locations on the wall:

Hanging Instructions: 24", 36", and 45" Hawaii Island Chains

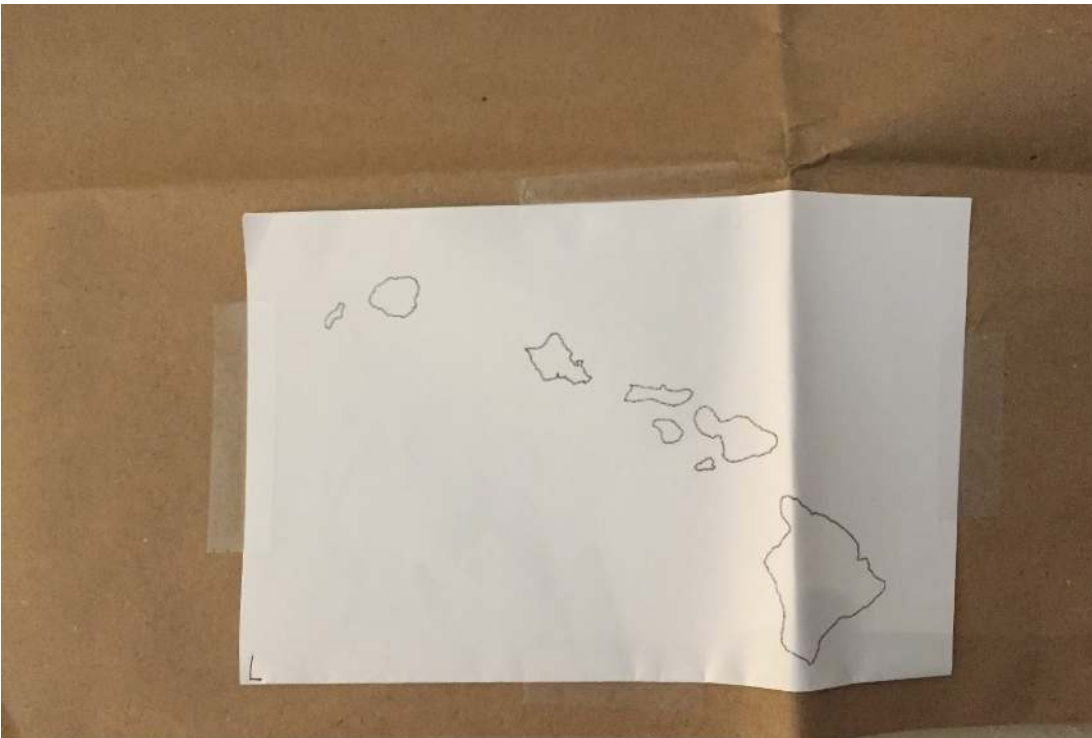

- Remove template and put the nails flush into all the marks except for the big island location (far right). Screw the drywall screw that was used to mark the locations on the wall, into the mark where the big island goes. Be sure not to screw the drywall screw all the way in, but keep it off the wall far enough to go into the hole of the big island's magnet:

Hanging Instructions: 24", 36", and 45" Hawaii Island Chains

Using the map on the template, arrange and orient the islands on the wall sticking the magnets on the nails:

Hanging Instructions: 24", 36", and 45" Hawaii Island Chains

Maintenance and Hanging Location

All island chains do not require any wax, oil, additional finish, or care. However, wood sets should be hung where they do not receive excessive sunlight, humidity, or temperature swings; such as those found in bathrooms, outdoors, etc. Metal clad sets are more tolerant of such factors, however, it is advisable they are not hung outside, or subjected to excessive humidity. (A 45" set is featured but these instructions also apply for 24" and 36" set sizes)
